DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-32, in the reply filed on 8/9/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-14, 16-25 and 27-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Commisso et al. (3,955,710). Commisso discloses, in figs. 1-3, a venting container made from a polymeric foam, a lid having ventable areas 16 formed by perforation cuts (see col. 1, lines 30-31, and col. 2, lines 20-22).

Claim Rejections - 35 USC § 103

4. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Case et al. (3,851,789) in view of Commisso et al. Case discloses, in figs 1 and 7 a polymeric foam container having a base, a lid and a hinged, and the lid being releasably latched to the base.

Case does not disclose the lid comprising ventable areas as claimed.

Art Unit: 3727

Commisso teaches polymeric foam container having a lid including ventable areas as claimed.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the Case lid with ventable areas as claimed, as taught by Commisso et al., in order to provide ventilation and finger holes for the container.
